

Veneziano

ECM[®] Espresso
Coffee
Machines

The perfect espresso machine for exceptional and professional results.

The Veneziano is a state-of-the-art espresso machine, which has been classically crafted to traditional Italian specifications.

This series of ECM Veneziano machines are available with 2 or 3 automatic heavy duty coffee brewing groups, all with static preinfusion chamber with an option for electronic preinfusion. This, combined with the machine's generously dimensioned thermosyphon system is crucial for the group's ability to conduct and retain the required thermic stability for optimal heat, important for the potential in the extraction process of espresso.

The use of quality heavy metals (Nickel, Brass, Copper and Stainless Steel) ensures optimal thermal stability and reliable commercial productivity. Each machine also has a very high boiler capacity - the two-group model holds up to 14 litres while the three-group machine holds 22 litres, which results in optimum steam capacity and makes recovery time faster than any machine on the market.

- Patented stainless steel 'no-burn' steam wands.
- Hot water tempering valve for precision temperature setting.
- Full metal stainless steel body (AISI 304BA).
- Large ergonomic open work space.
- Illuminated back panel for office company logo or cafe owner branding.
- 4 automatic microprocessor portion control shot levels.
- Semi-automatic push button function.
